Sanctuary Mountain Maungatautari is a world class conservation project and a must see when visiting New Zealand.

At 3400 hectares this is one of the largest pest-proof fenced projects in the world. We work to protect an ancient forest which is home to many of New Zealand's most endangered species - including kiwi, kaka, takahe, bats, frogs, tuatara and giant weta. Our successful kiwi recovery program has regenerated kiwi numbers from zero on the mountain in 2006 to over 2,000 birds today. The functioning ecosystem is as close to the pre-human New Zealand environment as it's possible to find.
